

The Web3 Stack, Explained

A new avatar of the internet has been creeping on the world. Cypto, NFTs and metaverse are merging to form the new internet – the highly decentralized web3 stack.

Metaverses

Digital worlds and fluid identity

NFTs/Digital Assets

Visual assets and goods. These can be anything from real estate to digital art

DAOs

Dynamic governance driven by smart contracts

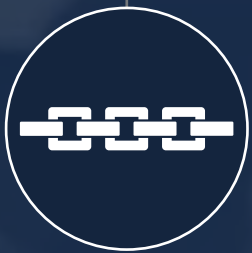

DApps

Autonomous business logic/applications

Tokenization & Crypto

Creator ownership

Blockchain

Decentralized access and sovereignty
